

40% 

of greenhouse gases are created by real estate

57 kg 

of newly mined minerals used per person, each day

There is an unmet need, and an urgency to act

2.6 degrees 

forecast rise in global temperatures by 2100

5.6 M 

deaths attributed to air pollution each year

1.5 M 

people added to the urban population each week

We can drive
positive social and environmental change
based on the belief that

WE CAN DO WELL
by doing right.

VISION

A low-carbon world in which property
is a force for social good.
